2018 Board of Director Elections - Candidate Statements

(In numerical order by unit number)

Ellen Bradley, Unit 208 I have been a Shareholder since July of 2013 and from the day I moved in I have loved living here. The history of Woodstock, my neighbors, fellow shareholders and Alameda itself have combined to make this a very happy time in my life. We have some pretty big changes coming up with development of the old NAS Alameda and I feel it is important that we stay current and up to date on the activity around us. I appreciate the work that the current board, management and staff of Woodstock do on a daily basis. I want to work with them to keep Woodstock a unique, safe, historic and thriving community. I hope to bring my communication, construction and life skills to the board to help make decisions that benefit all.

Amy Blair, Unit 322 Hello! My name is Amy Blair and I have lived in Woodstock since August 2015. Here's a little background about me! I have a master's degree in social work from the University of Chicago, and in my day job, I am a social worker for a non-profit organization providing mental health services to children in schools. I am running for the Board because I have a value about public service and would like to serve my Woodstock community. Qualities I would bring to the Board are collaboration and teamwork as well as a passion for improving our community. I have experience leading teams of people and working towards a common goal. In my free time I like to read, hike, work in my garden, and I love to watch the Golden State Warriors! I would be honored to serve on the Woodstock Board. Thank you!

Jeremy Rice Unit 503 My partner of 10 years, our 2 young children, and I live on Second Street. Currently employed in the field which I have been working in most of my adult life, the built environment, here, in the US, and previously in New Zealand where I completed a Bachelor of Building Science. As a building inspector for a city I bring purpose to projects combined with a desire to understand what others expect and this helps me lead in project delivery. During the last 2 decades of work, most types of construction have become familiar which affords a high level of assurance of correct path and lower risk. If chosen by you to be a board member for Woodstock I'll work towards methods to achieve efficiency in delivery of tangible service on the things you support. I look forward to seeking your input to inform my service to you!
